How we use your information

This Notice describes how we collect, use and process your personal data, and how, in doing so, we comply with our legal obligations to you. Your privacy is important to us, and we are committed to protecting and safeguarding your data privacy rights.

The health care professionals who provide you with care maintain records about your health and any treatment or care you have received previously (e.g. NHS Trust, GP Surgery, Walk-in clinic, etc.). These records help to provide you with the best possible healthcare.

NHS health records may be electronic, on paper or a mixture of both, and we use a combination of working practices and technology to ensure that your information is kept confidential and secure. Records which this GP Practice may hold about you may include the following information;

- Details about you, such as address and next of kin
- Any contact the surgery has had with you, such as appointments, clinic visits, emergency appointments, etc.
- Notes and reports about your health
- Details about your treatment and care
- Results of investigations, such as laboratory tests, x-rays, etc.
- Relevant information from other health professionals, relatives or those who care for you

To ensure you receive the best possible care, your records are used to facilitate the care you receive. Information held about you may be used to help protect the health of the public and to help us manage the NHS. Information may be used for clinical audit to monitor the quality of the service provided.

Some of this information will be held centrally and used for statistical purposes. Where we do this, we take strict measures to ensure that individual patients cannot be identified.

Sometimes your information may be requested to be used for research purposes – the surgery will always endeavour to gain your consent before releasing the information.

Patient Segmentation and Risk Stratification

Patient Segmentation and Risk Stratification Patient Segmentation and Risk stratification tools are increasingly being used in the NHS to help determine a person's risk of suffering a particular condition, preventing an unplanned or (re)admission and identifying a need for preventive intervention. Information about you is collected from a number of sources including NHS Trusts and from this GP Practice. A risk score is then arrived at through an analysis of your de-identified information using software managed by the Brent CCG as the data processor and is only provided back to your GP or member of your care team as data controller in an identifiable form. Patient Segmentation and Risk stratification enables your GP to focus on the preventing ill health and not just the treatment of sickness. If necessary your GP may be able to offer you additional services.

Please note that you have the right to opt out.

Should you have any concerns about how your information is managed at the surgery please contact the Practice Manager to discuss how the disclosure of your personal information can be limited.
